Mohammad Ali Abd Al-Wahed

Senior Software Engineer

00962797803934 ◇ aliabdm@gmail.com ◇ Amman, Amman Governorate, Jordan ◇
Nationality: Syrian Arab Republic ◇ Open to Remote ◇ Open to Relocate ◇ LinkedIn ◇ GitHub ◇ Medium ◇ Dev.to ◇ Website

SUMMARY

Experienced Software Engineer with strong focus on building scalable backend systems, system design, and production-grade software.
Proficient in backend development, system architecture, and performance optimization, with hands-on experience delivering reliable and maintainable systems across different domains.
Experienced in building APIs, distributed backend components, and AI-integrated applications with a focus on clean architecture and real-world scalability.

SKILLS

Software Development Laravel, SOLID, Design Patterns, SaaS
Systems Management Systems Infrastructure, Database Management
Research and Analysis Research
Languages English (Professional Working), Arabic (Native or Bilingual)

EXPERIENCE

Senior Software Engineer Jan '24 — Present
Bayt.com Dubai, United Arab Emirates (Remote)

- Leading backend development and architectural evolution of a multi-tenant SaaS platform (Evalufy), focusing on scalability, performance, and reliability.
  • Driving system-wide optimizations across caching, queues, and database performance, contributing to achieving ~99% system availability and significantly reducing downtime
  • Leading and mentoring junior and mid-level engineers, improving code quality and development standards
  • Shaping AI-driven features and aligning technical execution with product and business goals
  • Designing and scaling integrations with external HRMS platforms (e.g. SAP SuccessFactors), supporting business growth and expansion
  • Collaborating with cross-functional teams to plan and execute large-scale system improvements
  • Enhancing infrastructure using Docker and improving system resilience and maintainability
  • Improving email delivery reliability, eliminating message loss and ensuring consistent delivery across workflows
- Played a key role in stabilizing and re-architecting a multi-tenant SaaS platform that initially suffered from over-engineered and inconsistent infrastructure.
  • Re-architected database design (PostgreSQL), replacing inefficient question-level storage with a scalable, feature-ready structure
  • Replaced RabbitMQ-based architecture with optimized Redis-driven queues and caching, improving response times and reducing system overhead
  • Removed Keycloak dependency by building a custom authentication system with built-in SSO (OpenID), improving flexibility and maintainability
  • Designed and implemented a scalable “Plans” module supporting flexible subscription logic
  • Introduced design patterns (Factory, Observer) to standardize code structure and reduce technical debt
  • Built audit logging systems that significantly improved debugging, support workflows, and partner communication
  • Led query optimization efforts that improved performance of critical user-facing pages and system responsiveness
  • Revamped a core integration, which contributed to enabling ~4x (400%) revenue growth for the product
  • Improved system reliability and communication flows, achieving near-zero email loss and significantly enhancing delivery consistency
  This phase transformed the platform into a stable, scalable foundation, enabling rapid feature development and measurable business growth.

Back End Developer Dec '21 — Dec '23
iHR (International Human Resources) Riyadh, Saudi Arabia (Remote)

- Develop and maintain microservices for Ihrjobs.com the IHR ATS product, ensuring high performance, scalability, and reliability. Implement innovative features and enhancements to Ihrjobs.com and its microservices, leveraging Laravel framework to streamline client HR and recruitment processes. Create and maintain products related to HR field Spearheaded the creation of the Tabe3 platform, comprising a content management system (CMS), API, and dispatcher modules, facilitating real-time delivery and tracking services between end users and clients. Collaborated with stakeholders to gather requirements and translate them into technical specifications, ensuring alignment with business objectives and user needs. Successfully integrated the Tabe3 platform with a driver app, enabling seamless communication and real-time tracking between end users, clients, and drivers.

Web Developer Jul '21 — Nov '21
Qiotic Amman, Jordan

- design and create and implement and modify different solutions and applications using Laravel as a back-end, create and modify WordPress Websites

Full Stack Developer Dec '20 — Jun '21
Rawabi Farah Amman, Jordan

- Create and modify then maintain the RawabiFarah website using PHP Laravel, in addition, to creating the Farah e-commerce app and CMS and APIs

Product Owner Jan '19 — Nov '20
Yellow-Cow Amman, Jordan

- approach starting with meeting the clients and analyzing their businesses to collect the requirements ending with the maintenance stage and creating products full documentation managing the team during the circle in addition to writing content studying and analyzing competitors and creating company's documents develop Yellow Cow's business and creating researches based on the company's need

EDUCATION

Bachelor's degree in Computer Software Engineering, University of Petra Jan '13 — Jan '18
Amman, Jordan

PROJECTS

Context Vault Link May '26 — Present
Amman

- A local-first context platform with three surfaces: a Desktop app (Windows/Linux, Electron),a Chrome extension, and an npm CLI package (@aliabdm/contextvault). Captures LLM conversations from ChatGPT, Claude,Gemini, and others, records coding-agent sessions from Codex, Claude Code,and Cursor,indexes, give you the ability to search ,retrieves, and prepares focused Markdown context for the next agent.
- No backend, no accounts, no telemetry — all storage is local Markdown and JSON.

Ghost Job Detector Link May '26 — May '26
Amman, Jordan

- Ghost Job Detector is a web app that analyzes job descriptions and classifies them as:
- Legit,Ghost Job,Scam,Suspicious
- But it goes beyond classification,It explains WHY a job post is risky, translates corporate HR language into real meaning, and estimates who should actually apply.

Plainaid, https://github.com/aliabdm/plainaid Link Dec '25 — Dec '25
Amman, Jordan

- Transform complex legal, formal, and official documents into clear, actionable information using Elixir, Phoenix LiveView, and AI. Privacy-first, no signup required.

pdf-chat-rag, https://github.com/aliabdm/pdf-chat-rag Link Dec '25 — Dec '25
Amman

- Transform PDFs into interactive conversations with AI. Built with LangChain, Groq, and FAISS for lightning-fast RAG-powered Q&A. Upload any document and chat naturally! 🚀

Furtec, Github Repository Link Jul '24 — Aug '24
Amman

- Furtec is a Laravel 11 application built with PHP 8.2, showcasing a strong emphasis on design patterns and best practices. This project demonstrates the effective use of both the Repository and Service Design Patterns, providing a clean, maintainable and consistent codebase. Additionally, it includes some clever tricks for seeding and factoring

Laravel AI Showcase , https://github.com/aliabdm/laravel-ai-showcase Link Feb '26 — Feb '26
Amman, Jordan

- A professional Laravel AI SDK showcase featuring Mock Mode for instant demos and Real Mode for production with API keys. Includes real-time streaming, chat, image generation, text-to-speech, and semantic vector search.

hmvc-dp, github Link Dec '23 — Dec '23
Amman

- Explore the power of design patterns(Using Repository design pattern) and HMVC architecture in Laravel with this comprehensive repository

url-shortener-rails, https://github.com/aliabdm/url-shortener-rails Link

Dec '25 — Dec '25
Amman, Jordan

- ✂️ Free & Open Source URL Shortener built with Ruby on Rails. Create short links, track clicks, and generate QR codes instantly - no registration required. Deploy your own in minutes!

TECHNICAL WRITING

Experienced in creating a variety of professional documents, including studies, research reports, company profiles, and project manuals. Additional writing samples, including software documentation, are available upon request. I am adept at tailoring my writing to meet the specific needs of various audiences. To view examples of my work check my (Medium,Dev.to) articles, or please visit:*https://drive.google.com/drive/u/0/folders/1jbzXmJz-7Uu3Ci7Uy2Q14qRQ6NtvnIIg*
